Customer
Verification

Video KYC

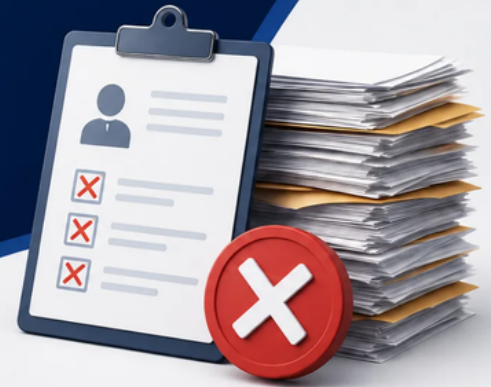

Digital

Secure

Trust Fintech's V-KYC Solution enables secure, AI-powered, and RBI-compliant remote customer verification for faster digital onboarding, improved efficiency, and a seamless customer experience. **Traditional KYC** processes involving branch visits and manual paperwork often lead to slower onboarding, higher costs, and customer drop-offs

Challenges in Traditional KYC

Traditional KYC processes involving branch visits, manual verification, and paper-based documentation slow customer onboarding, increase operational costs, and create compliance challenges, making it difficult to deliver a seamless customer experience

What Trust Fintech Provides

Secure Video Verification

Verify customers through live video interactions

AI-Powered Identity Validation

Enable face, liveness, and document verification

Digital Customer Onboarding

Deliver a seamless paperless onboarding process

RBI-Compliant Workflows

Support secure and compliant customer verification

Seamless CBS Integration

Automate customer and account creation

End-to-End V-KYC Platform

Manage the complete digital onboarding journey

Key Features

✓ **AI-Powered Video Verification**
Secure remote customer identity verification

✓ **Face Matching & Liveness Detection**
Prevent identity fraud through AI-based verification

✓ **Aadhaar OTP & PAN Verification**
Digitally authenticate customer identity

✓ **Digital Document Verification**
Validate identity and address proof documents

✓ **RBI V-CIP Compliance**
Ensure secure, compliant Video KYC processes

✓ **Seamless CBS Integration**
Automate customer onboarding and account creation

ID Document
✓ Verified

Face Match
✓ Verified

Liveness Check
✓ Verified

Watchlist Screening
✓ Clear

How the Solution Works

Customer Initiates

Registration begins with Aadhaar OTP or PAN-based authentication, auto-populating demographic details

Documents Are Captured Live

Identity and address proof are presented and scanned on camera, not pre-uploaded, in line with RBI's live-capture requirement

AI Verifies in Real Time

Face match, liveness, voice, and document checks run during the session itself

Application Moves to Review

A maker-checker workflow validates the session before approval

Customer Is Onboarded

Approved records flow into the bank's account opening and CBS workflow, standalone or fully integrated

Deployment Options

Standalone Deployment

Access verified customer records, reports, and audit data independently

CBS Integrated Deployment

Automatically synchronize verified customer data with the Core Banking System

Flexible Implementation

Adaptable to existing banking infrastructure

Scalable Architecture

Supports enterprise-wide deployments across branches and business units

Benefits

Accelerate Customer Onboarding

Reduce account opening turnaround time

Enhance Customer Experience

Enable convenient remote onboarding

Reduce Operational Costs

Minimize manual effort and paperwork

Strengthen Regulatory Compliance

Ensure RBI-compliant verification

Improve Security & Fraud Prevention

Detect identity fraud with AI-powered verification

Enable Paperless Digital Onboarding

Simplify end-to-end digital customer onboarding
